

# Strategic Scalability: Functional Service Provider Solutions

PRECISION   
for medicine®

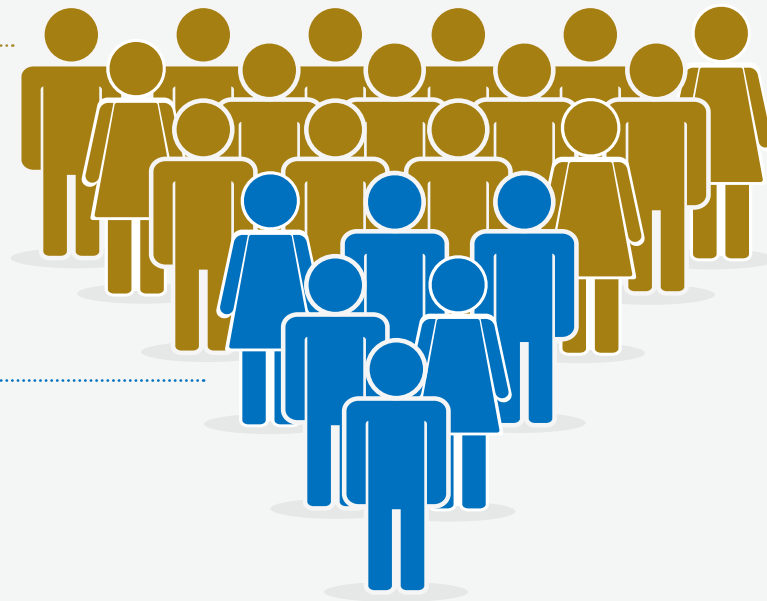

# Agile, Scalable Delivery Expertise at the Speed of Precision

Navigate the dynamics of research with agility and confidence. In addition to offering flexibility, superior data quality, and access to expert teams, Precision Functional Service Provider (FSP) relationships are founded on continuity, stability, and a long-term commitment to bringing life-changing treatments to those who need them most.

## FSP Partnerships That Keep Pace With Your Progress

### Strategically Aligned FSP Teams

- Global, cross-functional FSP teams
- KPIs aligned with development goals
- Joint resource and delivery planning
- Robust functional, operational, and executive governance
- Collaborative innovation

### Tailored to Project-Specific Needs

- FTE-based engagements
- Support at an individual study or full program level
- Scalable as per volume of work
- Operational oversight and retention

## Custom FSP Models

### Staff Augmentation

This FTE-based model flexibly scales from individual resources to comprehensive functional teams, augmenting your delivery capacity. Precision FTEs—selected for specific skills and expertise—integrate into your environment, delivering projects as an extension of your team. This model helps meet immediate staffing needs and guarantees smooth onboarding, continuity, and operational governance.

### Precision FSP

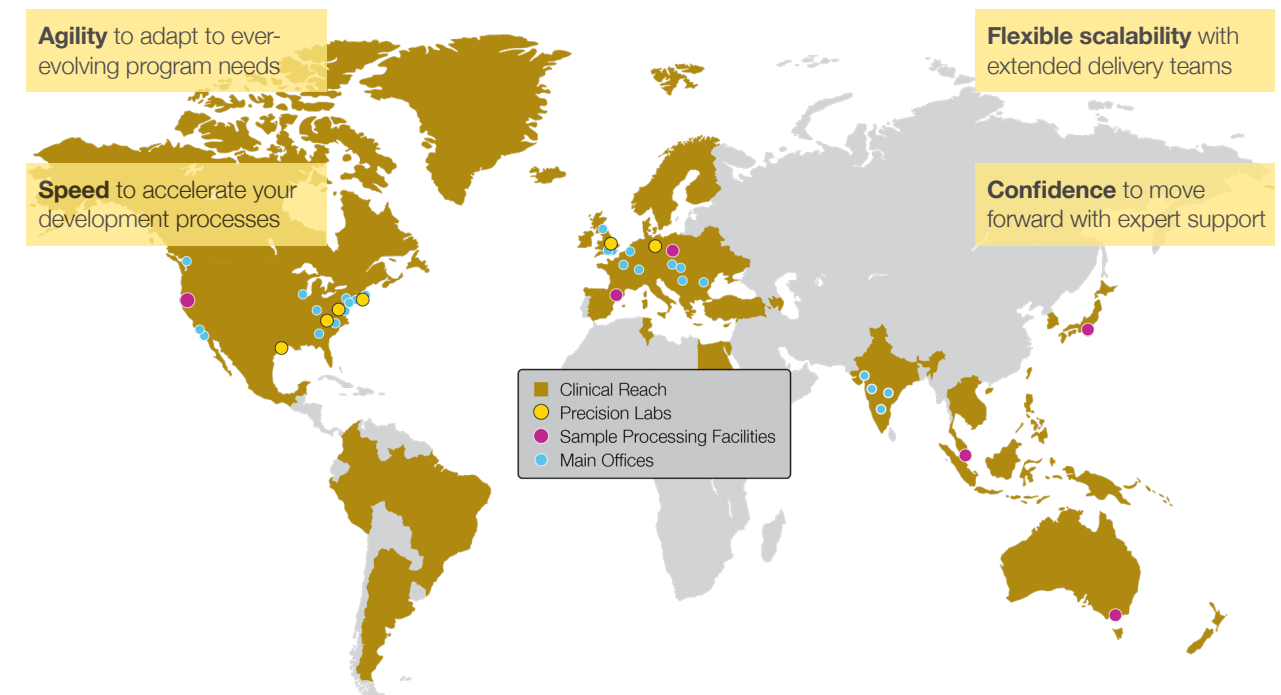

Building strategically aligned FSP teams, whether across a single functional area or region or multiple, Precision FSP enables continual adaptation and flexible scaling based on your program needs. While you retain complete control of your program, our teams handle resourcing, ensuring timely, high-quality delivery. Supported by a robust governance structure, Precision FSP partnerships are founded on a shared vision of success, empowering you to reach your development objectives.

## Functional Coverage for FSP Solutions

Clinical Monitoring	Clinical Data Management	Biostatistics
Global and regional clinical operations teams, strategically aligned to your therapeutic areas and trial locations, with a specialized focus on accelerating study startup.	Expert teams of database programmers, clinical data associates, and clinical data managers bringing extensive experience with leading EDC platforms and clinical technologies.	Seasoned lead and support biostatisticians with significant design, execution, and submission experience, across traditional and complex clinical programs.
Statistical Programming	Medical Writing	Pharmacovigilance and Safety Services
Globally distributed programming teams, spanning various experience levels, that deliver the right expertise to meet your individual program needs and submission timelines.	Expert medical writers with diverse submission experience that support your projects from protocol development through to CSR submission.	Comprehensive drug safety management provided through extended or centralized pharmacovigilance teams.

## Bridging Expertise Gaps Globally

With 40+ offices worldwide, Precision ensures access to top-tier staff who provide valuable regional insights. With global teams across the US, Europe, and Asia Pacific, you gain round-the-clock coverage, driving business continuity and seamless project delivery, increased efficiency, and greater risk reduction. This strategy significantly expedites your clinical development processes to help you maintain your business momentum.
